

HTML-Assignment

- 1) Write HTML code to develop a Web page having the background in red and title “My First Page” in any other colour.

HTML code:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <title>My First Page</title>
  <style>
    body{
      background-color: red;
    }
  </style>
</head>
<body>

</body>
</html>
```

Output:

2)) Create an HTML document giving details of your name, age, telephone number, address, TLC code & enrolment number aligned in proper order.

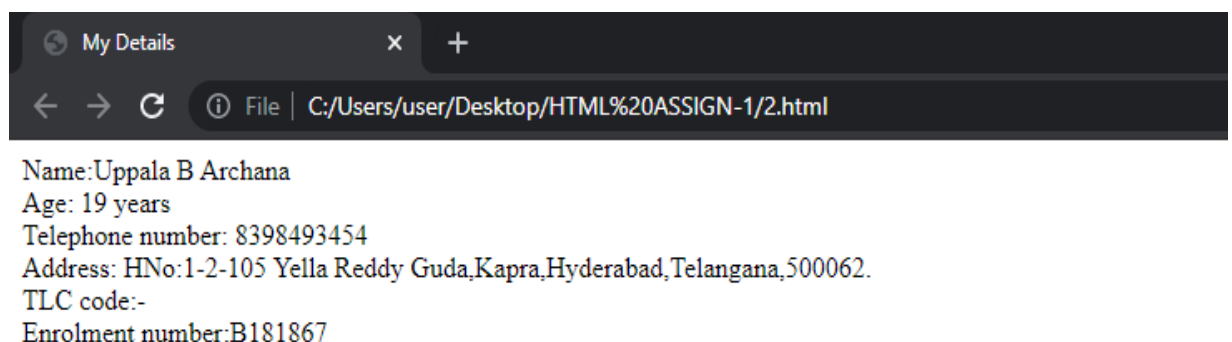

HTml code:

```
<!DOCTYPE html>
<html>
<head>
  <title>My Details</title>
  <style>

  </style>
</head>
<body>
  Name:Uppala B Archana<br>
  Age: 19 years<br>
  Telephone number: 8398493454<br>
  Address: HNo:1-2-
105 Yella Reddy Guda,Kapra,Hyderabad,Telangana,500062.<br>
  TLC code:-<br>
  Enrolment number:B181867<br>

</body>
</html>
```

output:

3) Write an HTML code to design a page containing text, in form of paragraphs giving suitable heading style.

HTML code:

```
<!DOCTYPE html>
<html>
<head>
  <title>Document</title>
  <style>

    p{
      text-align: justify;
      font-
family: 'Franklin Gothic Medium', 'Arial Narrow', Arial, sans-serif;

    }
    h1{
      font-
family: 'Franklin Gothic Medium', 'Arial Narrow', Arial, sans-serif;
    }
  </style>
</head>
<body>
  <h1>Paragraphs</h1>

  &nbsp;
  &nbsp;  <!--to add extra spaces between -->
  &nbsp;

  <h1>What is a paragraph?</h1>
  <p>A paragraph is a series of related sentences developing a centra
l idea, called the topic. Try to think about paragraphs in terms of the
matic unity: a paragraph is a sentence or a group of sentences that sup
ports one central, unified idea. Paragraphs add one idea at a time to y
our broader argument.
  </p>

  &nbsp;

  <h1>How do I unify my ideas in a paragraph?</h1>
```

```
<p>Probably the most effective way to achieve paragraph unity is to express the central idea of the paragraph in a topic sentence.</p>
```

```
&nbsp;
```

```
<p>Topic sentences are similar to mini thesis statements. Like a thesis statement, a topic sentence has a specific main point. Whereas the thesis is the main point of the essay, the topic sentence is the main point of the paragraph. Like the thesis statement, a topic sentence has a unifying function. But a thesis statement or topic sentence alone doesn't guarantee unity. An essay is unified if all the paragraphs relate to the thesis, whereas a paragraph is unified if all the sentences relate to the topic sentence. Note: Not all paragraphs need topic sentences. In particular, opening and closing paragraphs, which serve different functions from body paragraphs, generally don't have topic sentences.
```

```
</p>

```
</body>
```

```
</html>
```

Output:

The screenshot shows a web browser window with a single tab titled 'Document'. The address bar shows the file path 'C:/Users/user/Desktop/HTML%20ASSIGN-1/3.html'. The page content is as follows:

Paragraphs

Written by Margaret Procter, Writing Support, and Vikki Visvis, University College Writing Centre

What is a paragraph?

A paragraph is a series of related sentences developing a central idea, called the topic. Try to think about paragraphs in terms of thematic unity: a paragraph is a sentence or a group of sentences that supports one central, unified idea. Paragraphs add one idea at a time to your broader argument.

How do I unify my ideas in a paragraph?

Probably the most effective way to achieve paragraph unity is to express the central idea of the paragraph in a topic sentence.

Topic sentences are similar to mini thesis statements. Like a thesis statement, a topic sentence has a specific main point. Whereas the thesis is the main point of the essay, the topic sentence is the main point of the paragraph. Like the thesis statement, a topic sentence has a unifying function. But a thesis statement or topic sentence alone doesn't guarantee unity. An essay is unified if all the paragraphs relate to the thesis, whereas a paragraph is unified if all the sentences relate to the topic sentence. Note: Not all paragraphs need topic sentences. In particular, opening and closing paragraphs, which serve different functions from body paragraphs, generally don't have topic sentences.

4) Create a page to show different attributes of Font tag. Create a page to show different attributes: italics, bold, underline. Design a page having background colour yellow, giving text colour red and using all the attributes of font tag.

HTML code:

```
<!DOCTYPE html>
<html>
<head>
  <title>Document</title>
  <style>
    body{
      background-color: yellow;
      color: red;
    }
  </style>
</head>
<body>
  <b>Bold text</b><br>
  <strong>Important text</strong><br>
  <i>Italic text</i><br>
  <em>Emphasized text</em><br>
  <mark>Marked text</mark><br>
  <small>Smaller text</small><br>
  <del>Deleted text</del><br>
  <ins>Underline text</ins><br>
  H<sub>2</sub>o<br>
  x<sup>2</sup><br>
</body>
</html>
```

Output:
